UNWITTING ASSET

PROFILE

Public face of Meridian Risk Group, the private contractor pivoting from physical muscle to predictive surveillance. Presents as the architect and owner-operator of the firm. Polished, persuasive, built for the boardroom and the ministerial anteroom. Carries the TRINETRA pitch into rooms a soldier could not enter.

DISPOSITION

Operates on the premise that presence is substance: if the room believes him, he is real. Anxious beneath the gloss, shallow, conflict-avoidant. Will not examine the parts of the company he does not control, and reads that incuriosity in himself as confidence.

UTILITY

High-value as a credibility surface and lightning rod. Absorbs scrutiny, regulatory and journalistic, that would otherwise reach the firm's structure. His eventual exposure is itself a function: it satisfies investigators while the structure behind him stays intact.

VULNERABILITY

Vanity, dependence on external validation, and terror of being seen as hollow. Will not whistle-blow because doing so requires admitting what he is. Compromisable through flattery, access, and the fear of exposure rather than money.

KNOWN ASSOCIATES

TRAINING

No intelligence or military background. Trained by the private sector: management consultancy, investor relations, corporate communications. Fluent in the grammar of decks, valuations, and risk language. Coached, knowingly or not, in message discipline and on-camera composure. No tradecraft, no fieldcraft, no counter-surveillance instinct.

CAPABILITIES

Persuasion, access, and social camouflage at the elite tier. Can open doors in government, finance, and press that operational personnel cannot. Reads rooms for sentiment, not for threat. No technical command of the TRINETRA stack he sells; recites capability claims he cannot evaluate. Negligible self-protection; cannot detect that he is run.

OPERATIONAL RECORD — SELECTED

- 2025 — fronted TRINETRA pitch to state interlocutors; reception warm
- 2025 — public profile raised; press positions him as Meridian principal
- 2026 — scrutiny converging on his name and filings
- 2026 — flagged for probable exposure event; containment value noted

DISPOSAL CONTINGENCY — POST-EXPOS [REDACTED] [SEALED]

THREAT LEVEL - LOW (DIRECT) / HIGH (AS CONDUIT)

Harmless on his own; dangerous as the legitimacy surface that lets the apparatus operate.

STANDING ORDERS

Maintain surveillance, do not approach. Treat as instrument, not principal: anything he states about Meridian's ownership is to be logged as cover, not fact. Do not burn him prematurely; his exposure is most useful when it draws scrutiny away from the structure. Trace every line of authority that runs past him, not to him. Escalate the moment a chain of control points beyond his desk.
