DECEASED

IDENTIFICATION

Career army officer absorbed into the external service early; rose through station postings to the chair. Of record a Pillar of the Inception era (c. 2008). Deceased by the present. This readership is briefed on his decisions, not on what those decisions concealed.

SERVICE HISTORY

Decades of station and headquarters work spanning the western and eastern theatres before the chief's appointment. Reputation among peers: institutional, unbribeable, allergic to theatre. No financial flags. No lifestyle flags. The cleanest file a chief ever left, which is itself a fact worth holding.

WHEREABOUTS OF THE SUPPRESSED PR [REDACTED] [SEALED]
TRUE BENEFICIARY OF THE SILENCE [REDACTED] [SEALED]

THE BURIAL (2008)

On assessment that surfacing a junior officer's discovery would compromise live operations and risk a larger crisis, he ordered the finding suppressed. He judged the truth costlier than the lie and signed for the lie. The suppression left the discovering officer (JANAKI) exposed and convinced a second officer (FATEH) the sanctioned route was closed. His recorded sin is concealment. Not murder; not the sanction of any killing.

WORLDVIEW

Held that the state subsists on the secrets its servants agree to keep, and that a chief's hardest duty is to carry an unshareable arithmetic alone. He believed the burial protected operations and nothing more. That belief is reproduced here as he held it; the file does not endorse it.

DEATH

Died at the hands of a protege he had trained (KABIR). By all available account he met it without resistance and at peace, the death serving an operational purpose downstream. Detail held below the line.

TRAINING

Standard army commission and infantry grounding, then full external-service tradecraft: agent handling, station management, cross-border running on the western and eastern frontiers. Strongest in the discipline he died practising – compartmentation, the keeping of a secret past the point where keeping it costs the keeper everything.

CAPABILITIES

At peak, total command of the institution's operational memory and its off-books levers. Authority to bury a finding service-wide and make the burial hold for years. His real instrument was institutional trust: subordinates executed his judgement without sight of his reasoning, which is precisely how a single concealment propagated unchecked into the present crisis.

FULL PURPOSE OF THE FINAL MEETING [REDACTED] [SEALED]

THREAT LEVEL - RESIDUAL (POSTHUMOUS)

Subject is dead; the decision he carried is not. The buried matter is now live and is the proximate trigger

STANDING ORDERS

Treat as closed personnel, open consequence. Do not eulogise and do not exonerate; the concealment is the operative fact, not the man's character. Run all Inception-era threads back through this file before actioning. Restrict the two sealed annexes and the final-meeting annexe to cleared readers only; this readership receives the decisions, never the truths beneath them. Any approach claiming knowledge of the suppressed material is flagged upward at once.
