ROGUE

IDENTITY & ORIGIN

Subject is martial-caste Rajput out of the Marwar belt, recruited young into the sanctioned program, decorated in record but unpromoted past his ceiling. Discreet, austere, no recorded vices. Reads as a true believer of the old service, not a careerist.

SERVICE HISTORY

Co-architect with his founding partner of an original sanctioned R&AW program, wound up after the 2007 collapse in which the partner was recorded killed in action. Subject did not retire. He withdrew off-books and stood up the present Alpha unit on his own authority, funding and personnel unaccounted for.

CURRENT POSTURE

Runs Alpha from the fortified base 'Lanka' as a self-licensed instrument against a named terror outfit. Operates half as a national weapon, half as a personal monument. Unit has recently fractured from within: his principal field asset defected, executed a first kill at a high-end NCR venue, and turned on the base. Subject reads this as betrayal.

IDEOLOGY / MOTIVATION

Holds that love and ownership are one act, and that he alone still defends a service 'gone soft.' Grand, self-justifying, certain. The doctrine licences every cost he has imposed. Note: subject's certainty is brittle — recent operational signatures appear to be destabilising his account of his own history.

DEPENDENT

Raised a female ward from infancy (acquired 2007–08); she addresses him as 'Baba.' Not biological issue. Subject conditioned her from childhood as the unit's primary instrument. Bond is total and proprietary.

TRAINING

Full sanctioned-program tradecraft: agent handling, conditioning and long-build asset development, interrogation, deniable wet work, document and legend fabrication. Marwar martial upbringing plus decades of field running. Master of the original program's house methodology, which he can both author and recognise on sight.

CAPABILITIES

Builds and runs human instruments from nothing; converts dependents into weapons. Commands a fortified, self-funded off-books unit with its own logistics and shooters. Deep institutional knowledge of R&AW tasking and the contested national surveillance-prediction grid. Greatest asset and exposure both: he reads tradecraft signatures better than anyone in service – including ghosts in a methodology that should be dead.

OPERATIONAL RECORD – SELECTED

2007 – original program collapses; founding partner recorded KIA.
2007-08 – Alpha stood up off-books; infant ward acquired and brought under subject's roof.
2008+ – long-build conditioning of ward as primary instrument.
2025 – ward executes first sanctioned kill, high-end venue, NCR; clean.
2025-26 – ward defects; orders refused; assault on 'Lanka'; unit fractured.
2026 – subject reads adversary handling and reacts as if recognising a known signature [see sealed]

ACTUAL STATUS OF FOUNDING PARTNER [REDACTED] [SEALED]

THREAT LEVEL - SEVERE

Self-licensed, well-resourced, ideologically certain, and now personally destabilised – least predictable

STANDING ORDERS

Locate and fix 'Lanka'; do not assault without sanction. Maintain Sehgal channel for tasking visibility but compartment all product away from Alpha. Do not approach the ward; treat as subject's instrument until reclassified. Flag any indication subject is acting on a recognition he should not possess, and report upward same-day, eyes only. Detain alive if possible – subject's testimony implicates more than himself.
