CLEARED

BACKGROUND

Long-serving administrative officer of the Coordination & Tasking Secretariat. Rose on procedure, not field work. Passed over for the top desk twice; carries the resentment openly enough that colleagues read it as ordinary careerist bitterness. Believes the service used him and gave nothing back.

CURRENT FUNCTION

Holds tasking reach: routes leads into the intelligence stream, allocates targets to off-books units, steers officer-to-operation assignments. Recently directed officer Kaul toward the Fateh matter and seeded the first-kill lead into Fateh's unit. Open file reads these as defensible desk calls within his remit.

STATUS OF PRINCIPAL	[REDACTED]	[SEALED]

DISPOSITION

Frightened, transactional, self-justifying. Tells anyone who will listen that the whole service is bought, that nobody is clean. Internal psych note flags the rationalization but stops short of a finding.

CONTACT PATTERN

Avoids direct meetings. Communicates through intermediaries even on legitimate business; explained as personal caution after a past leak scare. Has never been observed meeting any external principal.

TRAINING

Standard service induction decades past; administrative and tradecraft refreshers as required for compartmented handling. No field-operations background. Strength is bureaucratic: he knows the tasking machinery, the allocation rules, and where a lead can be inserted without leaving a routing fingerprint.

CAPABILITIES

Can place a target into the live intelligence stream and make it read as legitimate tasking. Can assign or withhold officers, accelerate or bury a file, and shape what a unit believes it discovered on its own. His danger is positional, not physical: he moves the board without appearing to touch it.

OPERATIONAL RECORD — SELECTED

2025 – directed Kaul toward the Fateh matter (logged as routine allocation)
2025 – seeded first-kill lead into Fateh's unit via tasking desk
2025-26 – sustained avoidance of direct contact; all business via intermediaries
2026 – re-vetting passed; no adverse finding recorded

OFF-BOOK TASKINGS PLACED FOR PRIN [REDACTED] [SEALED]

THREAT LEVEL - HIGH (covert)

Trusted insider with tasking reach; can corrupt the intelligence stream undetected.

STANDING ORDERS

Do not approach or alert. Treat current open file as cover-clean and leave personnel hold in place. Maintain discreet observation of tasking decisions and intermediary contacts; log every lead he routes and every officer he assigns. Priority objective is to walk the cutout chain upward to the principal, not to burn the asset. Any direct confrontation requires sign-off at the authorising level below.
