ACTIVE

PROFILE

Mid-tier ideologue who climbed from courier to logistics to faction control over two decades in the network. Disciplined, money-clean in his own accounting, treats cash as fuel and never as motive. Reads as a genuine true believer; carries himself as a professional answering to a state, not a paymaster.

RECRUITMENT POSTURE

Subject believes he was approached and cultivated by officers of a sympathetic foreign service who share the cause. All contact is one-way through a cutout. He has never met a principal, never seen a flag, and accepts the absence as standard tradecraft. He does not know he is being run, nor by whom above the cutout.

ACTUAL PURPOSE OF THE STRIKE		[SEALED]

CURRENT TASKING

Steering his outfit toward a single high-visibility strike on Indian soil, dressed to him as a strategic operation of the foreign sponsor. He plans it as cause and war. He is unaware the strike has been scoped, timed and target-shaped for a purpose external to his network.

ASSESSMENT

The exploitable seam. He is the only human bridge between the militant network and the buyer above the cutout, and he does not know the second half of that sentence exists. Pull him and the whole thread comes with him. Pressure-test by following the cutout's money, not the man.

TRAINING

Field-trained inside the network rather than at any academy: courier discipline, dead-drop and hawala accounting, cell compartmentation, counter-surveillance on foot and by vehicle, basic small-arms and improvised-munitions handling. Strong human-network tradecraft, weak signals hygiene. Long border-crossing experience along the eastern corridor.

CAPABILITIES

Can raise, fund, move and aim a militant cell against a metro target with low forewarning. Commands real operational loyalty and can mount a coordinated strike on tasking. Limited against modern surveillance: trusts his cutout absolutely, treats the absence of a visible principal as discipline, and has no defence against being run from above. Believes he is the ceiling of his own operation.

OPERATIONAL RECORD – SELECTED

2025 Q2 – Cutout reactivates; new funding tranche received, read by subject as foreign-service back
2025 Q3 – Begins target survey, eastern corridor into metro theatre
2025 Q4 – Cell hardened, lieutenants briefed on compartmented need-to-know basis
2026 Q1 – Strike package finalised; subject committed, believing operation is a state directive
2026 Q1 – FLAG: hostile principal identified subject as entry thread, surveillance opened
TRUE END-USER OF THE OPERATION [REDACTED] [SEALED]

THREAT LEVEL - HIGH

Live, funded, committed to an imminent metro strike; lethal not for what he knows but for what he can be m

STANDING ORDERS

Do not lift. Keep subject running and unaware. Map every node downstream of the cutout before any approach, and work the money channel rather than the man. Treat him as the open end of the thread: surveillance only, no disruption that would alert the cutout or collapse the chain above it. Escalate to case authority before any contact.
