ACTIVE

PROFILE

Field officer, recruited young, distinguished early by an unusual read on human motivation rather than tradecraft mechanics. Assessed as the service's strongest asset-handler of her cohort: she does not break sources, she persuades them. Genuine, compassionate, loyal. No security flags.

OPERATIONAL ROLE

Co-lead on the current line. Selected by control specifically to turn a high-value hostile-built asset (ASSET-S) where coercive approaches were judged likely to fail. Briefed to deliver a calibrated disclosure that the asset was stolen and weaponised by subject FATEH and that her stated origin is fabricated. Officer believes this disclosure to be complete and accurate.

PSYCHOLOGICAL PROFILE

Doctrine of the officer: a person is not their file; compassion is method, not weakness. Treats honesty as her primary instrument. This is her strength and her exposure: she carries her brief as conviction, which makes her sincerity unusually persuasive and unusually resistant to her own doubt.

RISK NOTES

No disloyalty indicators. Not a mole. Principal risk is over-identification with assets and full personal commitment to a narrative she has not independently verified. When targeted for elimination by ASSET-S she reportedly declined to fight and requested to be heard.

KNOWN ASSOCIATES

CONTROL Kaul – case authority; tasked and scripted the turn op; sole source of her brief
TARGET ASSET ASSET-S (Sita) – hostile-built operative; objective of the turn; later directed
SUBJECT Fateh – architect of the off-books unit; named in the officer's disclosure as the
SENIOR SERVICE Sehgal – ranking officer adjacent to the controlling line; status per operational

TRAINING

Standard R&AW field course plus extended HUMINT and elicitation specialisation. Strong in source assessment, rapport-building, cover legend maintenance, surveillance and counter-surveillance, hawala/trade-laundering node mapping. Adequate but unremarkable in close-quarters and small arms; her file repeatedly notes she resolves situations by talk, not force.

CAPABILITIES

Best-in-cohort asset acquisition and turning. Reads motivation and need under pressure and converts it. Operates clean across the Bangkok and Dubai laundering corridors and the Northeast crossings. Effective unarmed-resolution and de-escalation. Weak point: low willingness to use lethal force and high willingness to trust a brief handed to her.

OPERATIONAL RECORD — SELECTED

- 2025-Q4: Bangkok — trade-based laundering node mapping, liaison cover.
- 2026-01: Dubai — hawala settlement surveillance, target development.
- 2026-02: Reassigned to turn-op against ASSET-S under Kaul.
- 2026-03: Calibrated disclosure delivered to ASSET-S; contact established.
- 2026-03: Officer reported targeted; sought parley, not extraction.

TRUE OUTCOME OF OFFICER-ASSET CON [REDACTED] [SEALED]

THREAT LEVEL - LOW

Loyal officer; no hostile intent. Exposure is to manipulation and emotional capture, not defection.

STANDING ORDERS

Continue the turn op against ASSET-S on the disclosure script as issued by control; do not deviate from the sanctioned narrative or volunteer beyond it; maintain cover and corridor access; report all asset contact to Kaul without intermediary. No independent investigation of the brief's provenance. Withhold all read-up beyond this readership's clearance.
