ACTIVE - DEEP COVE

ORIGIN (FILE VERSION)

Per the carried account: subject orphaned in infancy when hostile network operatives murdered her mother; recovered and sheltered by her controller, who raised and trained her in isolation. Named for a woman the controller is said to have admired. This is the version the subject holds and acts upon. The readership is to treat it as the operative narrative only.

PSYCHOLOGICAL PROFILE

Single fixed loyalty, anchored on the controller. Discipline near-total. Flags one anomaly: a persistent investigative instinct, an aversion to smoothed-over narrative, that the subject herself distrusts. Assessed as latent and destabilising. The subject is beginning to register it as her own. Monitor.

TRADECRAFT

Reads people to a forensic standard: micro-tells, deception cues, the inconsistency in a rehearsed story. Operates solo, leaves no signature. Tasked against the transnational narcotics enterprise (Golden Triangle product via Myanmar and the Northeast crossings; the seized Golden Crescent pipeline through Punjab; laundering via Bangkok and Dubai).

CURRENT POSTURE

Operational and reliable to date. One contact event (handler-designate 'Mira') has introduced exogenous narrative material into the subject's belief set. Effect on loyalty anchor not yet resolved. Treat as a possible turning vector.

KNOWN ASSOCIATES

CONTROL / 'BABA' controller of record; raised, trained and tasks the subject; sole loyal
MIRA external contact; delivered a destabilising account to the subject; alignment and f
JANAKI (DECEASED, c.2008) former R&AW analyst; detected the foreign network at inception
KABIR recluse, remote Himalayan monastery; fixed point both eras circle; contact pending

TRAINING

Raised from infancy in isolation as a controlled-environment build: no civilian schooling on record, full handler control of inputs. Conditioned across behavioural reading, deception detection, languages, tradecraft and close-quarters lethal skills. First sanctioned kill executed on her eighteenth birthday as graduation. No documented external instructors; the training pipeline is the controller alone.

CAPABILITIES

Elite close-target eliminator: silent approach, improvised and edged-weapon kills, clean exfiltration, zero recoverable signature. Human-intelligence instrument of the first order, able to detect a buried lie under pressure. Carries one personal effect of operational interest, retained since infancy. Principal vulnerability is the loyalty anchor: the subject's effectiveness is built on a belief set that, if broken, redirects rather than neutralises her.

OPERATIONAL RECORD — SELECTED

2026 / FIRST SANCTION – hotel-room target on majority; clean; no blowback
2026 / tasked against Northeast corridor (Moreh, Mizoram crossings)
2026 / Golden Crescent pipeline interdiction support, Punjab
2026 / CONTACT EVENT – approach by 'Mira'; narrative material logged
2026 / behavioural drift noted; anchor stability under review
TRUE NATURE OF SUBJECT KEEPSAKE [REDACTED] [SEALED]

THREAT LEVEL - SEVERE (conditional)

Negligible while anchor holds; uncontainable if the loyalty anchor breaks and redirects.

STANDING ORDERS

Maintain at distance; do not attempt direct recruitment or confrontation. Preserve the carried origin narrative; no element of the sealed material is to reach the subject through this service. Log every contact event against the anchor. Escalate to case authority on any sign the loyalty anchor is failing. No independent action against CONTROL without authority sign-off.
